

Environmental policy of Preftek

Preftek is committed to providing a quality service in a manner that ensures a safe and healthy workplace for our employees and minimizes our potential impact on the environment. We will operate in compliance with all relevant environmental legislation and will strive to use pollution prevention and environmental best practices in all we do. With these policies in place we believe that we can achieve a healthy and safe environment.

We take care of our workers

We are providing a safe and healthful workplace and ensure that personnel are properly trained with the appropriate safety and emergency equipment. We also establish procedures to ensure that all employees are knowledgeable of, understand and comply with all applicable environmental laws and regulations. We are promoting environmental awareness among our employees and encourage them to work in an environmentally responsible manner.

We focus on environment

It is our duty to be an environmentally responsible neighbor in the community where we operate, and correct incidents or conditions that endanger health, safety or the environment – on site or in the office. Also, as far as it is possible, purchase products and services that do the least damage to the environment.

We improve everyday

We develop and improve operations and technologies to minimize waste and other pollutions, minimize health and safety risks, and dispose of waste safely and responsibly. We also participate in efforts to improve environmental protection and strive to continually improve Prefteks' environmental management system.

We use energy wisely

Our goal is to minimise energy and water use within our buildings and processes in order to conserve supplies and minimise the consumption of natural resources.

These principles are related to other policies and values of Preftek and lie at the very heart of our daily work. By never-ending improvement of ourselves, our work processes and communication with surrounding parties we are reaching for our “moving target” of becoming a leading company of the field.

Audrius Daniulis
CEO at Preftek
